Best video player for windows 10

Media has always been a big part of the Windows experience, but now it's more important than ever. We stream videos and music from different sites and from our own local storage media. As an Amazon Associate, I earn money from eligible purchases. This means that we should have the best media player available so that we can enjoy it in its entirety. There are so many options out there that it can be hard to choose from, so here are the best video players for Windows 10 PCs (PC, Laptop, etc.). Below you will find both free and paid options for people who also need professional alternatives. 1) VLC Media Player VLC is one of the best free and open media players around. Other players do less and are not even free. VLC plays all kinds of media files, from AVI and DivX to MP3 and DVD. Using a range of open source codec to power it, VLC media player is like a Swiss army knife for video and audio players. It may not look like some other players, but one of the best things is that it's completely free. If you want to support open source projects, VLC is the king of the hill. Also, if you have a media file that you just can't open, there's a chance that VLC will be able to play it. 2) 5KPlayer 5KPlayer should be on the list of video players that do a good job playing ultra high definition video such as 4K, 5K and 8K. It seems that ultra high definition is the way of the future as more and more TV and film producers are getting on board with technology. That's why you need good software that can play such videos in your spare time. 5KPlayer also supports nvidia platform for GPU-accelerated software, so playing any file won't be a problem in Windows 10. Unlike some other free players, 5KPlayer also offers the ability to convert between file types, take snapshots of moving videos, and even create radio stations. 3) Pot Player Pot Player is a completely modern player that offers hardware acceleration where it is supported. This makes it fast and easy to use. Although it may not support as many formats as VLC, it still supports an impressive list. Users can even download and install their own codec when required, so this is not a problem. One of the most interesting aspects is that it supports 3D viewing and can easily stream directly to a TV that has the necessary support. This means that Pot Player can easily become the center of any home media setup. 4) Real Player Real Player has existed since the late 90's, making him one of the oldest and most mature video players. At that time she had to rediscover herself, but this created a modern player who has different than other players. Real Player can easily play a wide range of video formats, but one of the most interesting things is that it can also download videos from sites like YouTube. This means that it can be stored in the real player video library for later viewing. If you live with others and you don't want anyone to watch your videos, you can also protect them with a PIN. This is a unique feature that makes Real Player attractive. 5) MediaMonkey MediaMonkey can only be the king of video and audio library management. With a built-in, highly organized database, MediaMonkey can handle over 100,000 audio and video files without losing rhythm. It also has very smart tools such as volume normalization, so you never have to adjust the volume again when playing files with different volumes. This makes it great for events and other events where background music is needed. Combine this with automatic tagging and automatic renaming of files, and Media Monkey can work perfectly at the center of any home media configuration. There is also a paid version that is worth seeing the additional tools it offers, such as advanced search function and auto-playlist generation. 6) MPlayer MPlayer prioritizes compatibility and performance across many different platforms, making it a great choice for people who just want software that works well. It also has compatibility with a wide range of video drivers, including many old and obsolete, so it makes a great choice for modern operating systems like Windows 10, but also older systems that may not have the necessary resources. 7) WinDVD What really sets WinDVD apart from other video programs is that it has a beautiful modern interface and full support for Blu-Ray and HD video. This makes it a great choice for anyone who loves high definition movies and wants to be able to play them using software that looks great, has a full set of easy-to-use controls, plays videos very smoothly and supports a wide range of video file formats including 3D video formats. 8) Windows Media Player for Windows 10 Windows Media Player 10 is the latest media player for Windows , which promises the best experience for Windows users, whether on a desktop, laptop, or Surface Pro. Windows Media Player has been around for many years and is now a fully mature product that positions itself as a versatile media player for the Windows platform. If you want maximum compatibility, a fluid user interface and one of the best media environments on any Windows device, then this is the software for you. 9) GOM Lab There are two versions of GOM Player, free and plus. Even the free version offers impressive features, including video playback while downloading, playback of files that may be damaged or damaged, and a comprehensive database of subtitles with a ten-year history. The latter feature means that you can play any video and probably find the subtitle in your language without through internet search. If you want smooth, ad-free playback, the plus version also supports ultra-high-resolution 4K video. 10) JRiver Media Center If almost endless customization aesses you, JRiver Media Center is one of the programs to look at. Na, it has been around for some time in various incarnations, but this release puts it at the center of any home media setup. Of course, it has a comprehensive media database that goes far beyond supporting video and audio. It also supports images so you can manage your photo collection. If you need to open documents, you can do so. This really is a Swiss media software army knife. JRiver Media Center also offers great forums, customer service, fantastic audiophile sound quality and an easy-to-use control panel. 11) ACG Player Although less versatile than some multimedia software, ACG Player offers a really smooth operation of Windows. In fact, it was encoded from the ground up in native C++ to offer fast performance on the Windows 10 platform. This makes it the perfect choice for those who want a super fast and easy to use player that looks and sounds great. 12) KMPlayer KMPlayer is another old piece of software that has been around for some time and has adapted to the needs of the user. It is a simple player that offers many features for video lovers, including support for subtitles and built-in YouTube download functionality. It uses only a few system resources and does everything very well without the overt feel of other programs. In addition, it also supports Google VR and 4k video. 13) DivX DivX is a media format supported by a wide range of media playback devices. The official DivX application is the best way to play any DivX file and even convert other audio files to DivX format in the highest possible quality. This makes it easier to convert your entire video library into files that save space but look and sound great on any screen. 14) Kodi Kodi was once a project called XBMC, which was used and supported by the enthusiast community. Since then it has changed its name to Kodi and has become a fantastic free multimedia center that offers many customization options, active forum tweakers and other users and extensive platform support including Windows, Android, Linux, OSX and iOS. 15) Movies & TV app for Windows 10 If you don't want to browse huge lists of multimedia software and want to keep your Windows PC, laptop or tablet clean, you might want to use the built-in Movies & TV app. It's simple to use, works as expected in Windows across multiple devices, and integrates with the modern aesthetics of the Windows 10 design philosophy. If you regularly buy videos from the Microsoft Store, this is an app that you should use to manage your media library. It keeps everything simple, elegant and at your fingertips. 16) CyberLink PowerDVD It is advertised as the best media player software because it provides a great application that is user friendly and allows you to under the control of multimedia content. You can access your media library — including photos, videos, and music — instantly on any number of devices, from your mobile phone to your tablet and more. Other, provides seamless playback as the entire media collection is at your disposal 24/7. You can both enjoy and share all your videos, TV shows and photos anytime, anywhere, and the quality of these apps is much higher than you probably expected it to be. You can access the collection while traveling and share with family and friends, all at the touch of a button. 17) DVDFab Media Player (Free) DVDFab is a 4K UHD media player that allows you to have all your media files in one place, and even better, allows you to access them anytime, anywhere, while enjoying high quality movies and movies that are crisp and clear. There are three versions of DVDFab, one of which is a free version. The free version includes video playback support, which includes H.264, MPEG-4 and MPEG-2, WMV, and DivX media files; Support for audio playback, which includes Dolby Digital, PC mode, and TV mode and other features, such as a customized playlist and smart preview with thumbnails, among many other features. 18) DVDFab Media Player Pro DVDFab version offers everything that offers a free version and much more. This includes the ability to play DVDs and Ultra HD Blu-ray discs with native menus, original 3D discs and ISO files, and non-4K media. In addition, you can view the original HDR10 video for crystal clear images, as well as play high-resolution sounds like Dolby Atmos. The Pro DVDFab version is also very easy to use. Just download and install it, choose TV or PC mode, add DVD files and locate the target files to play them, and everything is clearly visible on the screen of your tablet or mobile phone. 19) MP4 player Although the MP4 player is not super fancy, it provides the ability to watch movies in a supported format without first converting. Mp4, FLV, and WebM files can be played on any Windows device. It can also accommodate MP3 and AAC files as well as most others, which means you'll have access to hundreds of media files of all types and sizes once you install the MP4 player. In addition to these resources, you can create a playlist from movies on your computer that you can release without having to go back to your computer and select a new movie. Video playback is also very smooth and clear, not to mention hassle-free playback. 20) Plex Company Plex Media Player promises a top-of-the-line media player that can make browsing from your media library a piece of cake, play videos of any kind of format you can imagine, and even support high-end features such as refresh rate switching, popcorn maker integration, rich subtitle support and display sync to replace A few. If you want top quality videos and a very user-friendly app, plex media player is it. Some features of the Plex media player are also distinguished, including advanced cross-platform hardware search and hardware support (even on Raspberry Pi 2). This is an extremely and offers fast and simple browsing, so if you're interested in a high-quality media player that's easy to use even for the technologically challenged, Plex certainly won't disappoint. Disappoint.
